

Touch

Furniture for the Curious

Touch Chair

Evolution of the work chair.

Touch is inspired by lightness, fluidity and hidden complexity. Designed for use in short bursts of activity, it is an evolution of the original work chair concept.

The chair shell is a complex injection moulding that was carefully developed through many iterations, from card and paper models, CNC foam and fiberglass prototypes prior to investment in tooling. Recycled and recyclable materials are used throughout, using Computer Aided Design to minimise their volume without compromising the structure.

Sustainability Policy

We realise the importance of responsible business practices and have in place numerous product and company sustainability certifications. We would encourage you to download our annual Sustainability Report from the ThinkingWorks website to get a full overview of our sustainability program.
