coffee shell waste from BKI's coffee
roasting process mixed with recycled
post-consumer e-waste.

Wood Waste Grey: wood waste mixed
with recycled post-consumer e-waste.

Frame
Steel tube, 20% recycled steel,
gunmetal finish

Finish
Lacquered

Made of recycled waste materials

Innovative technology allows us to make furniture of waste materials by combining a waste fibre with a waste binder material. The mix of materials results in a unique compound suitable for press moulding.

The Eternity Chair is made with a Matek® blend of coffee shell or wood waste mixed with recycled post-consumer e-waste.

Take-back system

Our unique Matek® material blends allow Mater to offer a circular take-back system. The take-back system is an essential step towards Mater's vision of becoming one hundred percent circular.

Maintenance guide

Please note that the seat is handcrafted and made from nature fibers, and plastic waste - minor blemishes and imperfections may be visible. These are not considered defects and do not interfere with the quality and function of the product. Always remove stains quickly before they can do any permanent damage to the furniture. When you move your furniture, make sure you lift it rather than pulling or pushing it to avoid damaging the floor, legs and mountings. Avoid improper use such as tilting, putting your feet on the furniture or standing on it. Be careful not to damage or scratch the surface with sharp objects. Minor spots of rust under the furniture and bases are considered as a natural result of general use.

Cleaning

Wipe with a clean cloth wrung in water or in a solution of water and a neutral detergent. Remove soap residue immediately using a clean dry cloth. Avoid using scouring cream or scouring pads, as they may scratch the surface. Minor scratches or damage to the powder coated surfaces can lead to corrosion. The life expectancy of your furniture will vary depending on the type of use. The upholstered seat must only be cleaned by a professional dry cleaner using tetrachloroethylene, normal process.
