

Vipp Swivel+ Chair

## The Swivel chair in a new functional version

**Vipp has refined its Swivel chair by adding more comfort and new features that enhance its ergonomics and seating experience.**

Named Swivel+ after its predecessor, Vipp presents an extra-padded, height-adjustable iteration of its renowned Swivel chair. Intended for home office and conference room settings where people sit for extended periods while working, the Swivel+ chair offers a larger backrest and a highly comfortable seat.

### Reengineered comfort

Like the original Swivel chair, the slender armrests continue straight into the discreet, padded backrest, giving the chair an almost airy expression despite its solid components. Designed with an adjustable height position, the seat branches out into a five-legged base on either castors or floor gliders, allowing for a 360° seat rotation.

*"After the introduction of the Swivel chair in 2021, I wished for a similar chair but with the comfort of 'sitting on clouds'. The new features and proportions of the Swivel+ make this chair ideal for versatile workspace seating,"* says Kasper Egelund, CEO, and 2nd generation Vipp owner.

The chair has an in-built tilt mechanism that follows the movements of the sitter, creating a smooth experience for the user when leaning back in a resting position and forward in a working position.

The Vipp Swivel+ chair is available in a selection of leather upholsteries and a dark sand-coloured textile version.

**Available from mid-November 2024, in Vipp stores and on Vipp.com**

**Low and high-res images are available [here](#).**

### Dimensions:

#### Castors

**About Vippp**

Vippp is a Danish, 3rd generation family-owned company. Founded by metalsmith Holger Nielsen in the small town of Randers, Denmark in 1939, his entrepreneurial debut was a practical waste bin initially crafted for his wife's hair salon. In over half a century, Vippp remained a prerogative for the professional market. When Holger passes away in the beginning of the nineties, his daughter Jette inherits the bin and a metal workshop in the backyard of her childhood home in Randers. Joined by her children, Kasper and Sofie, they set out to transform the bin into a brand.

When the bin gets accepted into the permanent design and architecture collection at MoMA in New York, the family knows that they are on the right track. Today, with its steadfast commitment to product engineering and design, Vippp equals a full-blown design universe of furniture, lighting, accessories, kitchens, and guesthouses.
